INFLATION INDEX FOR MACHINERY

Average Indices · as at 30. June 2026

Year of acquisition	Index	Incrase % until 30.06.2026
1978 or earlier	100.0	134.40%
1979	102.8	128.02%
1980	107.0	119.07%
1981	110.8	111.55%
1982	117.0	100.34%
1983	122.7	91.04%
1984	124.9	87.67%
1985	127.7	83.56%
1986	132.8	76.51%
1987	135.5	72.99%
1988	141.4	65.77%
1989	144.7	61.99%
1990	150.9	55.33%
1991	159.2	47.24%
1992	165.3	41.80%
1993	169.5	38.29%
1994	172.5	35.88%
1995	174.5	34.33%
1996	177.2	32.28%
1997	179.6	30.51%
1998	180.8	29.65%
1999	182.4	28.51%
2000	185.1	26.63%
2001	187.5	25.01%
2002	191.2	22.59%
2003	193.9	20.89%
2004	195.2	20.08%
2005	196.8	19.11%
2006	198.9	17.85%
2007	200.7	16.79%
2008	206.0	13.79%
2009	209.6	11.83%
2010	212.3	10.41%
2011	213.8	9.64%
2012	213.5	9.79%
2013	214.4	9.33%
2014	216.2	8.42%
2015	217.3	7.87%
2016	218.4	7.33%
2017	217.8	7.62%
2018	220.4	6.35%
2019	220.0	6.55%
2020	222.2	5.49%
2021	223.3	4.97%
2022	226.5	3.49%
2023	230.0	1.91%
2024	231.0	1.47%
2025	232.4	0.86%
2026	**234.4**	**0.00%**

Notes & Calculation

The inflation index is calculated on 30 June each year and remains valid until the end of the following year.

The figures given here are average indices for machines.

This table will help you to work out today's replacement values (new value).
For older machines, we recommend that you obtain quotes from suppliers.

Calculation of replacement values (new values): New value = acquisition value × 234.4 ÷ index for the year of acquisition

Insurance sums that accurately reflect the value of your property prevent underinsurance and avoid unpleasant financial consequences in the event of a claim!

In the event of underinsurance, the insurer calculates the compensation in the event of a claim using the following formula:

Sum insured × Amount of loss ÷ Value of the versicherten Sachen am Schadentag

Example:

Amount of loss: CHF 1,000,000
Replacement value: CHF 10,000,000
Sum insured: CHF 5,000,000
Payment from the insurer: CHF 500,000 (Your loss: CHF 500,000)
